

## MAPSYS – Interview Technical Task Assignment

Thank you for your interest in joining the MAPSYS team. As a Software Developer at MAPSYS, your role will be to provide full-stack web development consulting to a wide variety of public and private sector customers, working on internal and public facing applications.

The goal of this Interview Application Assignment is to evaluate your technical development skills, as well as utilize all of the other skills necessary to be a successful consultant at MAPSYS. Whether you have done all of the required tasks before or not, this assignment provides an opportunity to apply what you know and learn what you need to. The requirements are listed below.

1. Please use the referenced ZIP file to access all relevant materials for this assignment
2. Application should:
  - Be a web Application
  - Display documents listed in the “Interview\Documents.csv” file
  - Allow user to click on a link to view the document
  - Allow user to upload new document, and update Documents.csv file
  - Allow user to delete an existing document, and update Documents.csv
3. You may use any language that you prefer for the application.
4. Please fork your application from GitHub when complete at <https://github.com/MapsystInc/Interview>
5. There is no predefined time limit for this assignment, though it is helpful if you track your own hours.
6. Please feel free to contact [jhayford@mapsysinc.com](mailto:jhayford@mapsysinc.com) or [mpayne@mapsysinc.com](mailto:mpayne@mapsysinc.com) with any questions.

Thank you and Good Luck!
